

AR Collections Cycle

The recurring cadence from **billing date** to **final reminder** — when AR reports are uploaded, when credit terms lapse, and when reminders and calls go out to customers.

● Billing

● Credit deadline

● Report upload

● Reminder email

● Customer call

● Escalation

+ PIVOT – AR REPORT DATE

Everything below pivots off the **latest AR report** in the system: AR status, revenue tabs, and the 1st & final reminders are all tagged to that report's billing date.

BILLING MONTH

15th
JUL

● Billing

Billing date
Usually generated for the following month's cycle. Ad hoc billing can also run on other dates within the month — e.g. the 21st or 24th.

FOLLOWING MONTH

1st
AUG

● Credit deadline

14 calendar-day credit lapses
Payment due, 14 calendar days on from the billing date. GIRO deductions run on this date.

4th

AUG

• Report upload

AR report uploaded from NS

Every upload — this one included — runs the same standard routine:

STANDARD UPLOAD ROUTINE

1. Tag the report's **DATE** as the reference point for aging calculations
2. Insert column F and apply the aging formula
3. Group results by Dorm, then by SD / PF / 1FM / LP / SD / RM

7th

AUG

• Report upload

• Reminder email

• Customer call

Upload, first reminder & calling

↳ runs the standard upload routine (see 4th)

- **First reminder** — bulk email sent from the saved client name / email list (list is editable and re-savable)
- **Call customer** — logged via the Calling E-Form; repeat calls are allowed and each call is counted against a running call-status tally

15th

AUG

• Credit deadline

30 calendar-day credit lapses

Payment due, 30 calendar days on from the billing date.

16th

AUG

• Report upload

• Escalation

Upload & late-payment escalation

↳ runs the standard upload routine (see 4th)

- A **late payment report** is generated for accounts more than 14 calendar days overdue
- Sent to the AR team — sender picks one or more relationship managers from a dropdown

21st

AUG

• **Reminder email**

• **Customer call**

Final reminder & calling

- **Final reminder** — bulk email, same client list mechanism as the first reminder
- **Call customer** — same routine as the 7th: E-Form update, repeat calls allowed, call status counted

↻ Cycle repeats with next month's billing date

STANDING RULES

OUTSIDE THE CYCLE

An AR report can be uploaded at any time — aging is always keyed off the tagged **DATE column**, not the calendar date it happened to be uploaded.

Any report type (SD / PF / 1FM / SD / RM) can be emailed out on demand via the email dropdown, independent of the schedule above.

DOCUMENTS TO BE PROVIDED BY MES

- 1 First & final reminder email templates
- 2 Email templates for RM / AR team notices (e.g. late payment)
- 3 Revenue categories list
- 4 Client contact list

Digitized from the AR Workflow reference sheet • dates shown are an illustrative July→August cycle
