Hi Raman,

We've a few questions that would finalize our Requirement design document, these also shape the GUI prototype. Going through the reports and the SOP in detail, a few points need your confirmation so the reconciliation matches how your CSD team actually works. Where useful I've noted the assumption we're proceeding with in the meantime, so nothing is held up. Please correct anything that's off, and we're glad to walk through these on a call.

A. Reconciliation and matching

1. Linking a failed GIRO line to the right customer (most important). The DBS report identifies each line by DDA Reference (e.g. JPD...), Name, bank account and amount. The AR Report identifies customers by a Customer code (e.g. DORM-1220) and Company Name. How does the team currently match a rejected DBS line to the correct AR customer: is there a DDA-reference-to-customer mapping, do you match on company name (this is a common mapping point but wanted to confirm) or bank account, or is it done manually today?
2. Accounts that appear in only one file. When we match the two files, some records will sit in only one of them. How should we handle: (a) a customer with an outstanding balance in the AR Report but no line in the DBS report, and (b) a GIRO failure in the DBS report with no matching line in the AR aging? Should case (a) still be chased through the normal aging/reminder flow?
3. Format of the DBS report. The sample is in PNG format. Does DBS also provide a structured download (CSV / Excel), or is the PNG the only version?
4. Cycle timing, number of files, and entities. When does DBS run the GIRO deduction each month (the sample payment date is 04-May)? And do you receive one combined DBS report or one per property/entity? We noticed the properties map to different legal entities (MES & JPD Housing, KT Mesdorm, Kaki Bukit Developments), so we want to be sure we ingest the files in the right way

B. Account fields we need from the AR export

5. Live vs Terminated status. We group accounts by Live/Terminated. The earlier per-property AR export carried a Status column (Live/Terminated) and an Update notes column (not sure if this is imp but it tells the promise to pay and security deposit before in the first AR export sheet), but the current AR reports-Final.xlsx does not. Will the final export include the Status field ?
6. Revenue types. In our call you mentioned rental, maintenance, admin fee and security deposit, while the AR file has separate sheets for Stamp Duty, Park Fee and Late Fee. Could you confirm the full list of revenue types, and whether the type is a readable field inside the Detailed Full Report (Transaction Type / Description) or only implied by which sheet a line sits on?
7. The 1FM tag. The 3rd-week 1FM routing depends on locating this tag in the data. Where does 1FM live (Description, Linked Contract, a customer field, or a separate list), and what should happen to 1FM accounts (a specific template, routed to a particular person)?

C. Reminders and calls

8. Reminder audience and escalation. Do the 7th and 21st reminders go to every account 30+ days

overdue, or only to GIRO-failed accounts? And how many reminder levels are there, i.e. which template applies at which aging bucket (30 / 60 / 90 / 90+)?

9. Mid-month calling list (14th to 15th). Who lands on the call list: all overdue accounts, or only those who did not respond to the 7th reminder?

D. Users, access and email

10. Dashboard users and Relationship Managers. The AR file has two sheets, RM - User1 and RM - User2. Do these correspond to two specific Relationship Managers who should each log in and see only their own accounts, or is that split generic?

11. Sending emails. For the pilot, reminder emails will send from a Gmail service account and for production we will move to your MES domain. Please confirm this is acceptable, and let us know the MES sending domain/mailbox you'd like used in production so we can configure it later.

Best regards,
Taha

Hi Taha,

Give me next week to discuss with the team and revert.

Best Regards

Raman

Hi Raman,

Hope you are well.
Looking forward to it.

Regards,
Taha

Hi Taha,

I have simplified the workflow.

Lets discuss over a call.

hi Raman,

Thanks for sharing this

Please let us know a couple of your free slots for the meeting.

Taha.

Hi Taha,

Do you have a whatsapp number?

I find email comms is delayed by a day or more from your end. Like this it will be difficult for us to be in comms exchange in reasonable time without delay.

What time zone do you operate?

Best Regards

Raman

Hi Raman,

Absolutely, you can reach me on WhatsApp at +923344264186 for quicker communication. We operate in PKT (UTC+5), and communication will be way more smooth that way. Available from 3pm - 11pm Singapore timezone

Best regards,
Taha

Hi Raman,

Hope you are well. Can you confirm if you are available on Thursday at 12 pm SGT time. Once confirmed I will create an event.

Best regards,
Taha

Hi Taha,

Attached please find the Final AR Report that is required for parsing. We don't need the bank statement. Will discuss over the call on Thursday.

Best Regards
